MATHEMATICS OF THE USSR – SBORNIK

МАТЕМАТИЧЕСКИЙ СБОРНИК

Tom 78 (120) Nos. 1–4, 1969

Volume 7, Numbers 1–4 January–April, 1969 Pages 1–638

INDEX OF AUTHORS

Alekseev, V. M. *Quasirandom dynamical systems. III. Quasirandom oscillations of one-dimensional oscillators* 1

Andrienko, V. A. *Necessary conditions for imbedding the function classes* H_p^ω 273

Buhštaber, V. M. *Modules of differentials of the Atiyah-Hirzebruch spectral sequence* 299

Čirka, E. M. *Approximation by holomorphic functions on smooth manifolds in* C^n 95

Dektjarev, I. M. *Distribution of values under a mapping of manifolds* 115

Egorov, Ju. V. and Kondrat'ev, V. A. *The oblique derivative problem* 139

Evgrafov, M. A. and Postnikov, M. M. *A property of the Siegel modular group* 477

Freĭdlin, M. I. *Existence "in the large" of smooth solutions of degenerate quasilinear equations* 323

Gindikin, S. G. See Volevič, L. R. and Gindikin, S. G.

Golodec, V. Ja. *On factor-representations of types* II *and* III *for commutation relations* 491

Gončar, A. A. *Zolotarev problems connected with rational functions* 623

Gorin, E. A. and Lin, V. Ja. *Algebraic equations with continuous coefficients and some problems of the algebraic theory of braids* 569

Henkin, G. M. *Integral representations of functions holomorphic in strictly pseudo-convex domains and some applications* 597

Hudjaev, S. I. See Vol'pert, A. I. and Hudjaev, S. I.

Il'jašenko, Ju. S. *The origin of limit cycles under perturbation of the equation* $\frac{dw}{dz} = -\frac{R_z}{R_w}$, *where* $R(z, w)$ *is a polynomial* 353

Ivanov, L. D. *On the local structure of sets with finite variations* 79

Kazačkov, B. V. *Some conditions for strong factorability of groups* 341

Kondrat'ev, V. A. See Egorov, Ju. V. and Kondrat'ev, V. A.

Kuz'menčuk, V. A. *On exact operations on a class of topological groups* 251

Larionov, E. A. *On the number of fixed points of a linear-fractional transformation of an operator ball onto itself* 195

Lin, V. Ja. See Gorin, E. A. and Lin, V. Ja.

Lundina, D. Š. and Marčenko, V. A. *Refinement of inequalities characterizing stability of the inverse problem of scattering theory* 467

Marčenko, V. A. See Lundina, D. Š. and Marčenko, V. A.

Millionščikov, V. M. *A stability criterion for the probability spectrum of linear systems of differential equations with recurrent coefficients and a criterion for almost reducibility of systems with almost periodic coefficients* 171

Mosolov, P. P. *A functional connected with a surface of given mean curvature* 45

Napalkov, V. V. *On the continuability of the operator of generalized differentiation* 389
Nasonova, L. V. *Inequalities for algebraic polynomials* 119
Oleĭnikov, V. A. *The algebraic independence of the values of E-functions* 293
Pak, M. A. *On the decrease of solutions of linear elliptic equations with constant coefficients* 347
Pohožaev, S. I. *On nonlinear operators having weakly closed range, and quasilinear elliptic equations* 227
Poljak, B. T. *Semicontinuity of integral functionals and existence theorems on extremal problems* 59
Postnikov, M. M. See Evgrafov, M. A. and Postnikov, M. M.
Roĭtberg, Ja. A. and Šeftel', Z. G. *A theorem on homeomorphisms for elliptic systems and its applications* 439
Šeftel', Z. G. See Roĭtberg, Ja. A. and Šeftel', Z. G.
Talaljan, A. A. *Expansions in systems representing functions of the classes* $L_p[0, 1]$, $p \geq 1$ 415
Tynjanskiĭ, N. T. *Conjugate concave-convex functions in linear topological spaces and their saddle points* 503
Vaĭnberg, B. R. *Behavior of the solution of the Cauchy problem for a hyperbolic equation as* $t \to \infty$ 533
Volevič, L. R. and Gindikin, S. G. *The Cauchy problem for pluriparabolic differential equations. II* 205
Vinberg, È. B. *Some examples of crystallographic groups in Lobačevskiĭ spaces* 617
Vol'pert, A. I. and Hudjaev, S. I. *Cauchy's problem for degenerate second order quasilinear parabolic equations* 365
Zaĭcev, D. I. *On groups satisfying a weak minimal condition* 315
Zolotarev, G. N. *Uniqueness theorems for a class of integral representations* 399
